Personal Details

Name: Serge Tseiko
Date of Birth: 23th June 1986
Address: Czech Republic, Brno
Experience: 10+ years
Languages: Russian, English, elementary Czech

E-mail Address: sergei.tseiko@gmail.com

About

I like to write code and know how to write good one. Know when DB should be denormalized and when there is need to add another quick layer like Redis or Memcache. Remember that every data which comes from user should be checked. Twice. Can't work without version control system and always comment my code. Enjoy implementing non-trivial tasks and refactor spaghetti code. What can be better than spending days and weeks trying to make friends with google to find any possible hidden hint for issues without simple solution?

But I am not just a PHP developer — I am specialist who can do anything: write code on PHP or JS, create beautiful HTML pages and configure server. Or 5 servers. Or 20. I can just as well create a little webpage and help implementing a huge highload project. Can use one server for everything or create complicated system with different clusters for database, frontend, backend and cache subsystems.

Skills

Programming

- PHP
- Laravel ♥ ♥ ♥
- Symfony
- Eloquent, Doctrine ~~Zend DB~~
- Drupal 7 & Drupal 8
- ~~Zend Framework~~
- ~~Kohana~~
- ~~Smarty~~

Databases

- MariaDB / MySQL
- Redis
- Memcache
- ~~MongoDB~~

What helps to survive

- Git ~~Subversion~~
- Composer, Bower

- GitLab
- Redmine

Linux

- Using Gentoo linux more then 10 years as primary OS, Ubuntu, Ubuntu server
- SSH
- Bash/PHP scripting
- Cron
- Can configure SSH, Nginx, Apache, Mysql, Memcache, Redis, MongoDB, Git, ...
- VIM ♥ ♥ ♥
- Server status monitoring
- Backup management

Web Related Technologies

- HTML, CSS + SASS, Twitter Bootstrap
- Canvas
- Pure JavaScript, jQuery
- Domains management
- Geolocation

API

- Travelport (hotels booking)
- Tripauthority/ARN (hotels booking)
- Apple push messages
- Apple feedback service
- Twitter
- Facebook (JS/PHP, canvas app)
- IPInfoDB
- Encoding.com
- SOAP

Experience

Proof & Reason, s. r. o. (February 2018 - September 2020)

1. Drupal 7 and Drupal 8: support + custom modules
2. Symfony

Freelance, Appnostic Development s.r.o. (March 2015 - January 2017)

1. Support and develop: hotelsbyday.com
2. Laravel based project: flexbook.co
3. Booking hotels related projects with using external API for it: Travelport, Tripauthority (ARN).

4. SOAP
5. Twitter Bootstrap
6. SASS
7. Server supporting (hosted at Amazon)
8. Configuring project deploying with PHPDeploy tool (really love it!)

Apalon studios (Sept 2010 - Sept 2014)

1. Developed a Facebook Canvas game "Pics And Words".
2. Support and develop website livematrix.com:
    1. Develop and integrate advenced memcache layer between DB and Controller with relations system.
    2. E-mail subscribe system with daemon which sends letters through smtp.com
    3. Twitter notification daemon: more then 80k tweets at this moment.
    4. Integrate with "Kapow software Web Data Extraction".
3. Our company create iPhone applications so i create some internal services for apple push messages api. Work with Apple API for company's iOS applications:
    1. Develop internal services for push message API
    2. Integration with Apple feedback service
4. Integrate site mmorpg.com with video encoding service encoding.com.
5. Bugfix php-driver for salesforce.com.
6. Interview new candidates.

Softek (May 2010 - Aug 2010)

Develop web application which was meant to be ported to iPhone and Android through PhoneGap. Project was canceled.

Freelance (Feb 2010 - May 2010)

Work on some small projects and learn new technologies.

Profigroup (Feb 2008 - Feb 2010)

1. Support, bugfixing and development of new features for praca.by. Job search website, 2nd most popular in the country at that moment.
2. Support network of forums on the same engine but different DBs and templates. Deployment optimization.
3. Develop alpha version of normativka.by website from scratch.
